

**Amendments to the Specification:**

Please replace paragraph beginning on Page 22, Line 8 with the following amended paragraph:

The side openings 610 and 620 are located on the side portions 845 and 846 of the panel 450. The side portions 845 and 846 of the panel 450 make a horizontal angle  $\alpha$  840 to a line 847 that is perpendicular in the horizontal plane to the front face 825 of ~~with the normal reference to the panel 450.~~ Furthermore, the side portions 845 and 846 of the panel are oriented such that at least one of the side portions 845 and 846 face away from the front face 825 of the panel 450. In one embodiment, the angle  $\alpha$  840 may be approximately 0 to 45 degrees, and approximately 10 to 30 degrees in another embodiment. The resulting injected oxygen indicated by the vector 830, makes an angle  $\beta$  850 with the normal reference to the panel 450. In one embodiment, the angle  $\beta$  is approximately between 0 and 90 degrees, and approximately between 20 to 45 degrees in an alternative embodiment, and approximately between 30-35 degrees in yet another embodiment. In one embodiment, the angles  $\alpha$  840 and  $\beta$  850 may be different for each side. In an alternative embodiment, the angles  $\alpha$  840 and  $\beta$  850 may be approximately the same.
